Artemide, protagonist of the Outdoor residential segment

Artemide stands for excellence in Design, combined with continuous technological upgrade: this clear and consistent positioning has made the Company one the world leaders in indoor lighting. Today the unique and distinctive competences of the Artemide Group and its strong innovative skills give birth to the first Artemide Outdoor Catalogue.

A complete assortment of products for the outdoor light design projects, based on years of research and development. Great attention was devoted to the usage of innovative and eco-friendly materials. Most importantly, the Company has made a clear choice: to use only the most updated and efficient light sources, in order to minimise energy consumptions, CO2 emissions and maintenance costs. Therefore the Artemide Outdoor Catalogue presents an extensive usage of last generation LED sources, optical systems and highly performing heat dissipation devices, advanced electronic components. Moreover the products present a range of three different colour temperatures, and are combined with light control technologies that guarantee not only costs' and emissions' reduction, but also impactful and fascinating effects, so important for the outdoor light design projects.

The key point of difference of the new Artemide Outdoor Catalogue is the rich and complete offer, with solutions for all market needs and for all architects' and lighting designers' requests. The product assortment has been developed thanks to the production facilities of Pregnan Milanese, Megalit and NordLight, and include walk-over and drive-over items, LED profiles, recessed, effect and wall light fixtures, downlights and spotlights, bollards and poles or heads-poles.

The proposed solutions will fully meet the requirements of light design projects for hotels, shops, offices and public spaces. For such projects, facades, open air spaces and gardens are increasingly important, since they help create unique environments, they ensure pleasant and harmonic atmosphere, and they enhance the public image of companies and communities.

Artemide Group is a global leader in top-of-the-line residential and professional lighting. Founded in 1960 by Ernesto Gismondi, Artemide Group is based in Pregnan Milanese. It operates through 24 controlled and related companies and a distribution network with almost 60 single-brand showrooms in the main cities all around the world. Artemide products are distributed in 83 different countries.

With 5 plants in Italy, France, Hungary and United States, 2 glassworks and 2 Research and Development centers in Italy and France, nowadays the Group has more or less 700 employees, among which 59 in the R&D field, which confirms the essential role that innovation plays for the Group's success.

Innovation and sustainability

Research and testing on lighting concept, innovation and technology in light control and management, great attention to environmentally sustainable materials and, in general, to ecological requirements, and a deep-rooted devotion to design are values which distinguish Artemide and represent the ideas on which the outdoor products of this catalogue are based.

The care for sustainability of Artemide – a Company certified ISO 9001 and ISO 17025 – is ensured both by its French plant Megalit, in charge of designing and manufacturing the light fixtures of the architectural line, accredited with ISO 14001 and implementing the Carbon Footprint, and by its focus on product lifecycle (LCA), i.e. design, choice of raw materials, processing to minimize transportation, and down to assembly, packaging, and disposal. The improvement of the light fixture efficiency during use involves Energy-saving, reliability and lastingness of the implemented technical solutions with a consequent reduction of CO₂ emissions.

All Artemide light fixtures comply with European Directives and Standards and bear CE mark.

LED technology

With a wide experience in using LEDs for indoor light fixtures, Artemide exploits LED technological innovation also for outdoor light fixtures.

Aesthetic quality and design, distinguishing all Artemide products, combine with values which cannot be omitted, such as light distribution control, light fixture efficiency, reduced energy consumption and operation costs.

LEDs are suitable for different outdoor applications, from scenic lighting for enhancing façades and architectural elements to functional lighting of paths, urban areas, gardens, parks.

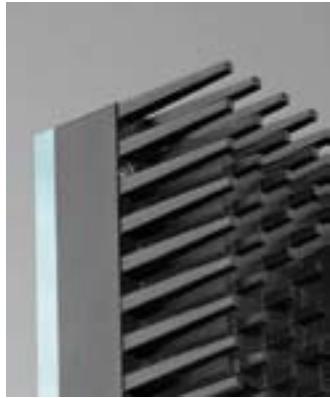

Economic and environmental advantages deriving from using LEDs are:

- high light efficiency
- low consumption
- reduced CO₂ emissions
- very long operation time
- short maintenance cycles
- reduced sizes

Moreover, solid-state lighting (SSL), which distinguishes LEDs, ensures an excellent shock and vibration resistance.

Besides development of excellent optical systems and selection of last-generation LEDs, Artemide focuses on heat dissipation systems and advanced electronic components, absolutely necessary for a correct use of this technology. To ensure a correct perception of spaces and architectural elements, Artemide products offer a range of three different colour temperatures: warm white, neutral white e cold white.

To obtain suggestive performances, Artemide offers RGB profiles and projectors using light and colour management protocols such as DALI and DMX, by which it is possible to create and programme light sceneries of great effect.

Heat dissipation

LEDs and lenses

Environmentally-friendly anti-corrosion surface treatment

The surface treatment of an outdoor lighting fixture exposed to extreme atmospheric agents and diverse weather conditions must ensure a suitable level of protection against the aggressive action of acid rains, saline or marine environments, humidity and UV radiations.

Technological research has always established the parameters for the application of surface treatments which determine the lifetime of such products. Today the result are still far from uniform in terms of an equal-environmental point of view due to the toxicity of existing low-cost products.

As part of its environmental policy Artemide has chosen not to use preservative chemical agents such as chrome and zinc (and their derivatives). With its own internal painting plant and cleaning process, the surface treatment of the Artemide outdoor range is in full compliance with RoHS RAEE standards and the following qualitative conditions are constantly observed:

- the Compound used for the protective coating of the crude component must be the most noble and inert available on the market.

- the crude component must receive the complete surface treatment by means of diamond structured anti oxidants that have minuscule carbon particles with a very compact diameter ranging between 2 and 8 nanometers, and must be free of any polluting agent.

- the anti-corrosion primer must be approved and in compliance with European Reach standards. This is important to ensure the traceability of the product components.

- the colour finish and degree of shine established by the designer, must have excellent resistance to harsh environments, even though it must always be in full compliance with environmental sustainability.

The painting plant cycle is provided with a pre-treatment tunnel that includes 6 stages of iron phosphate treatment and a rinse process together with a nanotechnological spray passivation process, consisting in the deposit of diamond structured molecules. This is useful to prepare the fixture for the application of the anti-corrosion epoxy powder primer through an electrostatic application system with dedicated spray cabins.

Once the polymerization has been completed through the dry oven, the powder paint finish with a polyester-free base is applied. Of course this application is carried out after the dry oven and reticulation at 190 degrees for 20 minutes and at the end of the painting cycle.

- Light fixture with high-performance LED light sources.
- Recessed floor installation.
- 5 sizes (55, 90, 150, 220, 320 mm).
- Round and square version.
- Composed by body, frame, black silkscreened tempered glass, recessing box.
- Body in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable H07RN-F (H05RN-F for versions 55 and 90). Electronic ballast integrated in the body; for versions 90 and 55: 24V power supply.
- Frame in aluminium or stainless steel.
- Power connection to the mains by means of the IP67 connector supplied with the light fixture, which can be fitted into the recessing box and is suitable for cables with a diameter of 5-13,5mm.
- Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
- Glass surface temperature lower than 40°C.
- Recessing box for laying in reinforced polymer, can be ordered separately.
- Adjustable optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- ENEC approved.
- Versions 55 and 90: insulation class III.
- Versions 150, 220 e 320: insulation class I.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood optic

Wide luminous flow suitable for lighting large areas.

Wall Washer optic

Elliptical distribution of the luminous flow suitable for wall washer effect.

Round or square frame in aluminium or stainless steel.
Silkscreened tempered glass.

T409902 Recessing box

-
- Light fixture with high-performance LED light sources.
 - Walk-over recessed floor installation.
 - 3 sizes (150, 220, 320 mm).
 - Round and square version.
 - Composed by body, black silkscreened glass flush with the floor, recessing box.
 - Body in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable H07RN-F.
Electronic ballast integrated in the body.
 - Power connection to the mains by means of the IP67 connector supplied with the light fixture, which can be housed in the recessing box and is suitable for cables with a diameter from 5 to 13.5 mm.
 - Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
 - Glass surface temperature lower than 40°C.
 - Recessing box for laying in reinforced polymer to be ordered separately.
- Adjustable optics. PMMA lenses in 3 different versions of beams.
 - White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
 - Screws in AISI 316 stainless steel.
 - Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
 - Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
 - IP Rating IP65-IP67.
 - ENEC approved.
 - Insulation class I.
 - Installation must be carried out by specialized personnel. Carefully follow the instructions.

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood optic

Wide luminous flow suitable for lighting large areas.

Wall Washer optic

Elliptical distribution of the luminous flow suitable for wall washer effect.

Ego walk-over

2011

- Light fixture with high-performance LED light sources.
- Recessed floor installation.
- Walk-over version.
- Low recessed depth (60 mm).
- 4 sizes (55, 90, 150, 220 mm).
- Round and square version.
- Composed by body, frame, black silkscreened tempered glass, recessing box.
- Body in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined two-pole connection cable H05RN-F.
- Frame in aluminium or stainless steel.
- Power connection to the mains by means of remote ballast.
- Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
- Glass surface temperature lower than 40°C.
- Recessing box for laying in reinforced polymer, can be ordered separately.
- Fixed optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- Insulation class III.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood optic

Wide luminous flow suitable for lighting large areas.

Wall Washer optic

Elliptical distribution of the luminous flow suitable for wall washer effect.

Ego vetro walk-over

2012

-
- Light fixture with high-performance LED light sources.
 - Walk-over recessed floor installation with low recessed depth (60 mm).
 - 2 sizes (150 e 220 mm).
 - Round and square version.
 - Composed by body, black silkscreened tempered glass flush with the floor, recessing box.
 - Body in die-cast EN AB44100 aluminium, silicone gaskets; provided with 30cm-long pre-resined two-pole connection cable H05RN-F. Remote electronic ballast.
 - Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
 - Glass surface temperature lower than 40°C.
 - Recessing box for laying in reinforced polymer, can be ordered separately.
 - Fixed optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
 - AISI 316 stainless steel screws.
 - Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
 - Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
 - IP Rating IP65-IP67.
 - Insulation class III.
 - Installation must be carried out by specialized personnel. Carefully follow the instructions.

Ego vetro walk-over

Ballast supplied separately

Lighting unit

Tempered glass flush with the floor

Recessing box in polymer

Recessed depth 60mm

Spot optic

Concentrated luminous flow
to highlight details avoiding unwanted
light dispersion.

Flood optic

Wide luminous flow suitable for lighting
large areas.

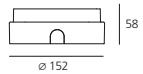

Wall Washer optic

Elliptical distribution of the luminous
flow suitable for wall washer effect.

- Light fixture with high-performance LED light sources.
- Recessed floor installation.
- Walk-over version.
- Low recessed depth (40mm).
- Box diameter 80mm.
- Spot diameter 33mm.
- Spot installation flush with the floor.
- Composed by spot unit, diffuser, recessing box.
- Body in black PVC, o-ring gaskets; provided with 10-cm pre-resined silicone single-pole connection cables.
- Computer numerical control machined billet diffuser in transparent polycarbonate.
- Electrical connection to the mains by means of transformer / remote ballast.
- Pressure-locked to the recessing box.
- Polycarbonate surface temperature lower than 40°C.
- Recessing box for laying in polymer, can be ordered separately.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP67.
- Insulation class III.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

- Light fixture with high-performance LED light sources.
- Recessed floor installation.
- 5 sizes (55, 90, 150, 220, 320 mm).
- Round and square version.
- Composed by body, frame, black silkscreened tempered glass, recessing box.
- Body in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable H07RN-F (H05RN-F for versions 55 and 90). Electronic ballast integrated in the body; for versions 90 and 55: 24V power supply.
- Frame in stainless steel.
- Power connection to the mains by means of the IP67 connector supplied with the light fixture, which can be housed in the recessing box and is suitable for cables with a diameter from 5 to 13.5 mm.
- Fixing to the recessing box3 is ensured by means of anti-vandal screws TORX.
- Glass surface temperature lower than 40°C.
- Recessing box for laying in reinforced polymer, can be ordered separately.
- Adjustable optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- ENEC approved.
- Versions 55 and 90: insulation class III.
- Versions 150, 220 and 320: insulation class I.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

T409902 Recessing box

Megara

design
Michele De Lucchi
2011

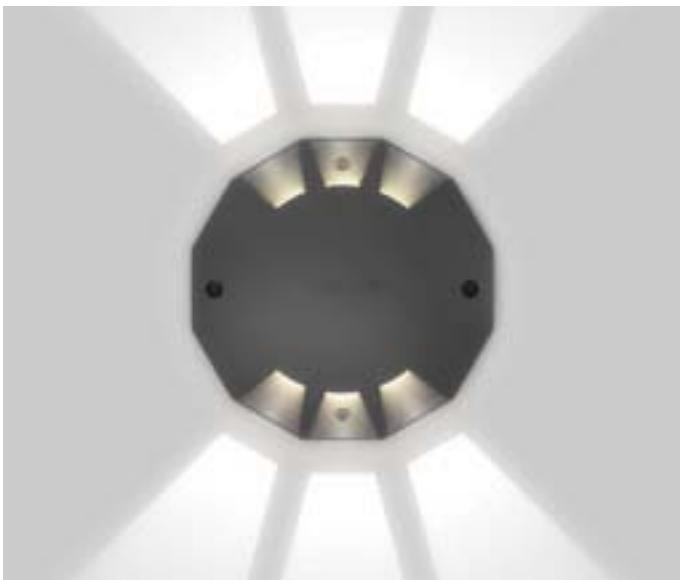

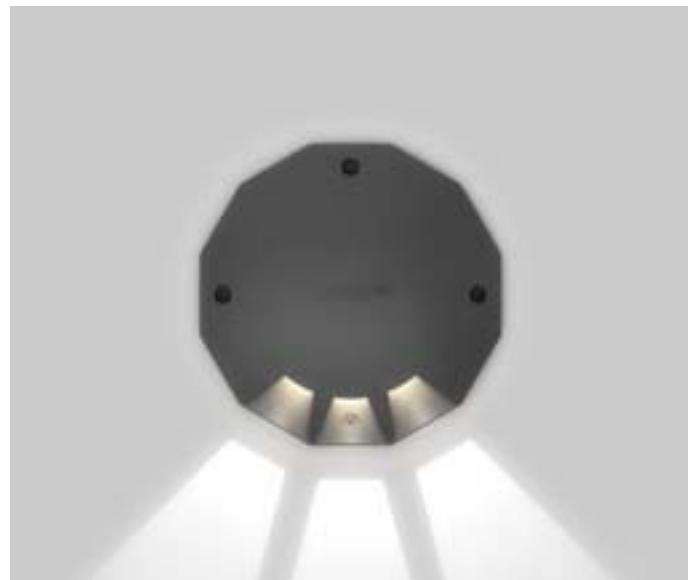

-
- Light fixture with high-performance LED light sources.
 - Drive-over recessed floor installation with floor-protruding cap.
 - 3 sizes (90, 150, 220 mm).
 - Composed by body, cap, diffuser, recessing box.
 - Body and cap in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable H07RN-F (H05RN-F for version 90).
Electronic ballast integrated in the body, for version 90: 24V power supply.
 - Diffuser in UV resistant polycarbonate.
 - Power connection to the mains by means of the IP67 connector supplied with the light fixture, which can be housed in the recessing box and is suitable for cables with a diameter from 5 to 13.3 mm.
 - Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
 - Recessing box for laying in reinforced polymer to be ordered separately.
 - Radial beam optic.
 - 1, 2, 4, 12 beam configurations.
 - White monochromatic LEDs available in 3 colour temperatures:
 - Warm = 3000K
 - Neutral = 4000K
 - Cold = 6000K
 - Screws in AISI 316 stainless steel.
 - Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
 - Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
 - IP Rating IP65-IP67.
 - ENEC approved.
 - Version 90: insulation class III.
 - Versions 150 and 220: insulation class I.
 - Installation must be carried out by specialized personnel. Carefully follow the instructions.

Rivoli

design
Ernesto Gismondi
2004

- Series of light fixtures with linear fluorescent sources.
- Recessed or frame installation.
- Side light emission is suitable for enhancing façades and vertical surfaces.
- Electronic ballast.
- Junction box and connector block to be ordered separately.

Rivoli recessed

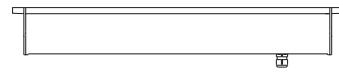

- Body in extruded aluminium.
- End pieces in die-cast aluminium.
- Silkscreened tempered glass diffuser thickness 8 mm.
- Recessing box to be ordered separately.
- Fixture provided with source and cable for the mains connection.
- Electronic ballast.
- Junction box and connector block to be ordered separately.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP67.
- ENEC approved.
- Insulation class I.

Rivoli cornice

- Ceiling or frame installation with emission upwards or downwards.
- Body in extruded aluminium.
- End pieces in die-cast aluminium.
- Aluminium optical housing.
- Silkscreened tempered glass diffuser thickness 5 mm.
- Adjustment by means of a fixing system to be ordered separately.
- Fixture provided with source and cable for the mains connection.
- Electronic ballast.
- Junction box and connector block to be ordered separately.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP67.
- ENEC approved.
- Insulation class II.

- Light fixture with 5mm LED light sources.
- Wall and ceiling installation by means of special accessories (clips).
- 5 lengths for monochromatic version (320,460,850,1250,1640mm).
- 5 lengths for RGB version (450,840,1230,1430,1630mm).
- 26mm-diameter body in UV-stabilized transparent polycarbonate.
- Pre-resined PVC stoppers with o-ring.
- IP68 cable gland PG7 in polyamide.
- Electrical connection to the mains by means of cable H05RN-F (monochromatic version) or 4x0,50mm² cable FEP-FEP (RGB version). Optional IP68 terminal boards.
- PVC clips for fixing and adjustment (standard supply).

- Glow wire test 960°C.
- White monochromatic LEDs available in 2 colour temperatures:
Warm = 2900K
Neutral = 4500K
- RGB version with red, green and blue monochromatic LEDs.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65.
- Insulation class III.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

- Light fixture with high-performance LED light sources.
- Walk-over and drive-over recessed floor installation.
- Walk over and drive over approved up to 5000Kg.
- 2 lengths (625mm, 985mm).
- Monochromatic or RGB light.
- Composed by body in extruded aluminium, protection glass; provided with junction box for input/output connection.
- Floor recessing box in steel.
- Electrical connection to the ballast by means of 100cm-long two-pole cable H05RN-F, with IP67 quick-release terminal block which is supplied with the fixture and can be housed in the recessing box.
- Body in extruded EN AW6060 T5 aluminum.
- End caps in injection-moulded polycarbonate with silicone gasket.
- 8mm-thick opal non-slip tempered glass.
- Glass surface temperature lower than 35°.
- Recessing box for laying in AISI 304 steel, with end caps and accessories for series connection (to be ordered separately).
- 24Vdc remote ballast.

- Body fastened to the recessing box by means of proper pre-stressed steel springs supplied with the fixture.
- Painted profile with 2-stage outdoor treatment: primer, outdoor paint.
- White monochromatic LEDs available in 2 colour temperatures:
Warm = 3000K
Neutral = 4000K
- RGB version with Full Colour RGB LEDs.
- IP Rating IP65-IP67.
- Insulation class III.
- Linea Led 60:
Connect a maximum number of 16 fixtures in a continuous line
- Linea Led 100:
Connect a maximum number of 10 fixtures in a continuous line.
- Technical features of light fixtures in compliance with EN60598-1.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

- Light fixture with high-performance LED light sources.
- Recessed wall installation.
- 3 lengths (240, 600, 970mm).
- Monochromatic light.
- Composed by body in extruded aluminium, protection glass; provided with junction box for input/output connection.
- Electrical connection to the ballast by means of 100cm-long two-pole cable H05RN-F, with IP68 quick-release terminal block, which is supplied with the fixture and can be housed in the recessing box; wall recessing box in steel.
- Body in extruded EN AW6060 T5 aluminum.
- 24Vdc remote ballast.
- End caps in extruded aluminium with silicone gasket.
- 4mm-thick transparent tempered glass.
- Glass surface temperature lower than 35°.
- Recessing box in extruded aluminium for laying in, with end caps and accessories for series connection (to be ordered separately).
- Fixture-recessing box fixing by means of proper seats on the extruded profile.
- Painted profile with 2-stage outdoor treatment: primer, outdoor paint.
- White monochromatic LEDs available in 2 colour temperatures:
Warm = 3000K
Neutral = 4000K
- IP Rating IP65.
- Insulation class III.
- Percorso 30:
Connect a maximum number of 40 fixtures in a continuous line.
- Percorso 60:
Connect a maximum number of 16 fixtures in a continuous line.
- Percorso 100:
Connect a maximum number of 10 fixtures in a continuous line.
- Technical features of light fixtures in compliance with EN60598-1.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Percorso

- Downlight fixture with high-performance LED light sources.
- Recessed suspended ceiling installation.
- 5 sizes (55, 90, 150, 220, 320 mm).
- Round and square version.
- Composed by body, frame, black silkscreened tempered glass.
- Body in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable H07RN-F (H05RN-F for versions 55 and 90). Electronic ballast integrated in the body; for versions 90 and 55: 24V power supply.
- Frame in aluminium or stainless steel.
- Power connection to the mains by means of the IP67 connector supplied with the light fixture, suitable for cables with a diameter from 5 to 13.5 mm.
- Adjustable optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- ENEC approved.
- Versions 55 and 90: insulation class III.
- Versions 150, 220 and 320: insulation class I.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

- Downlight fixture with high-performance LED light sources.
- Recessed suspended ceiling installation.
- 3 sizes (150, 220, 320 mm).
- Round and square version.
- Composed by body and black silkscreened tempered glass.
- Body in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable H07RN-F.
Electronic ballast integrated in the body.
- Power connection to the mains by means of the IP67 connector supplied with the light fixture, suitable for cables with a diameter from 5 to 13.5 mm.
- Adjustable optics.
PMMA lenses in 3 different versions of beams.

- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Ceiling mounting plate to be ordered separately.
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- ENEC approved.
- Insulation class I.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

T409916 Plate for plasterboard

Ego downlight

2011

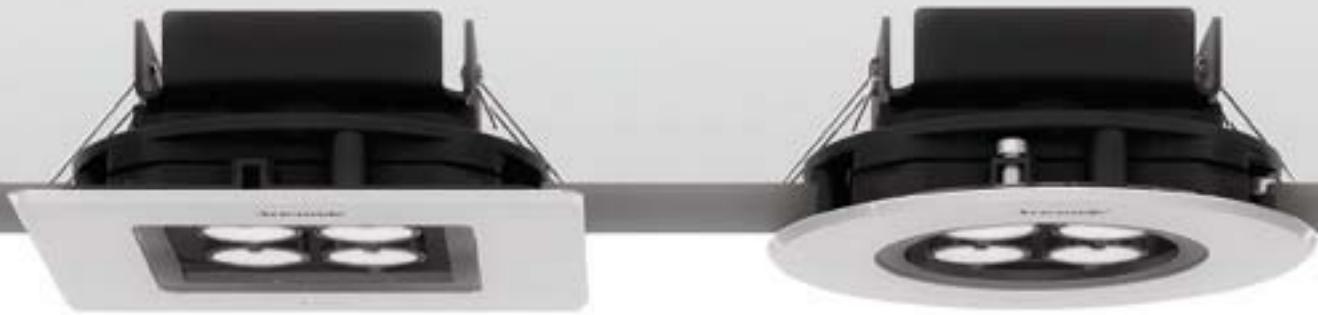

- Downlight fixture with high-performance LED light sources.
- Recessed suspended ceiling installation.
- Low recessed depth.
- 4 sizes (55, 90, 150, 220 mm).
- Round and square version.
- Composed by body, frame, black silkscreened tempered glass.
- Body in EN AB44100 aluminium, silicone gaskets; provided with 50cm-long pre-resined two-pole connection cable H05RN-F. Remote electronic ballast.
- Frame in aluminium or stainless steel.
- Springs in Harmonic Steel for fixing to plasterboard ceilings.
- Electrical connection to the mains by means of ballast.

- Fixed optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
 - Warm = 3000K
 - Neutral = 4000K
 - Cold = 6000K
- AISI 316 stainless steel screws.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- Insulation class III.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Ego downlight

Remote ballast
supplied separately.

Lighting unit
with built-in springs.

Round or square frame in aluminium
or stainless steel.
Silkscreened tempered glass.

Ego downlight

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood optic

Wide luminous flow suitable for lighting large areas.

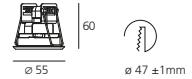

Wall Washer optic

Elliptical distribution of the luminous flow suitable for wall washer effect.

Ego vetro downlight

2012

- Downlight fixture with high-performance LED light sources.
- Recessed suspended ceiling installation.
- 2 sizes (150 e 220 mm).
- Round and square version.
- Composed by body, black silkscreened tempered glass.
- Springs in Harmonic Steel for fixing to plasterboard ceilings.
- Body in die-cast EN AB44100 aluminium, silicone gaskets; provided with 50cm-long pre-resined three-pole connection cable H05RN-F.
- Remote electronic ballast.
- Fixed optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
 - Warm = 3000K
 - Neutral = 4000K
 - Cold = 6000K
- AISI 316 stainless steel screws.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- Insulation class III.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

-
- Light fixture with adjustable direct emission, with high-performance LED light sources.
 - Floor, wall and eaves installation.
 - 2 sizes: Cefiso 14, Cefiso 20.
 - Available in two finishes: light grey painted and anthracite grey painted.
 - Composed by adjustable lighting unit and terminal board. Rotation on the base +/-180°, body tilting +/-90° by means of a graduated metal ring allowing an accurate adjustment. Positioning is maintained by means of locking dowels.
 - Body and terminal board in EN AB44100 aluminium, silicone gaskets. Electronic ballast integrated in the body.
 - Silkscreened tempered glass siliconed flush with the body to avoid backwater.
 - Wiring to be carried out inside the terminal board by piercing an IP65 grommet suitable for cables with a diameter of 8-13 mm.
 - PMMA lenses in 3 different versions of beams.
 - White monochromatic LEDs available in 3 colour temperatures:
 - Warm = 3000K
 - Neutral = 4000K
 - Cold = 6000K
 - Screws in AISI 316 stainless steel.
 - Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
 - Technical features of light fixtures in compliance with EN60598-1 and part 2-5.
 - IP Rating IP65.
 - ENEC approved.
 - Insulation class I.

220/240Vac 50/60Hz electronic ballast

- Light fixture with adjustable direct emission, with high-performance LED light sources.
- Floor, wall and ceiling installation.
- 2 sizes (diameter 103mm Ego Spot 5 and 110mm Ego Spot 7).
- Composed by body, frame, glass and bracket.
- Adjustable lighting unit. Rotation on the vertical axis +/-90°. Positioning is maintained by means of locking screws.
- Body and frame in computer numerical control machined billet aluminium.
- Painted spot with 2-stage outdoor treatment: primer, outdoor paint.
- EPDM gasket.
- Connection cable HO5RN-F with standard length of 1 meter.

- Remote ballast.
- PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 2 colour temperatures:
 - Warm = 3000K
 - Neutral = 4000K
- Picket for ground installation in galvanized sheet iron.
- AISI 316 stainless steel screws.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-5.
- IP Rating IP65.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Chateau Montfort, Milan - IT Architectural Project: Arch. Federico Vedani

- Light fixture with high-performance LED light sources.
- Ground, floor, wall installation.
- Composed by body, metal ring, diffuser in transparent polycarbonate.
- Body and metal ring in computer numerical control machined billet anticorodal aluminium.
- Painted spot with 2-stage outdoor treatment: primer, outdoor paint.
- Silicone gaskets.
- 100cm-long two-pole connection cable H05RN-F.
- Fixed optic. PMMA lenses in 3 different versions of beams (10°, 25°, 40°).
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Picket for ground installation in galvanized sheet iron.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65.
- Insulation class III.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

- Light fixture with high-performance LED light sources.
- Wall installation.
- Square version.
- Adjustable spot lamp on the axis perpendicular to the wall (90°) and on the axis parallel to the wall by means of spot head rotation (355°).
- Composed by adjustable structure, spot unit, diffuser in transparent polycarbonate
- Spot unit in computer numerical control machined billet anticorodal aluminium.
- Painted projector with 2-stage outdoor treatment: primer, outdoor paint.
- Anodized finishing.
- Electrical connection to the mains by means of remote ballast.
- Silicone gaskets.
- 50 cm-long two-pole connection cable H05RN-F.
- Fixed optic. PMMA lenses in 3 different versions of beams (10°, 30°, elliptical).
- White monochromatic LEDs available in 2 colour temperatures:
 - Warm = 3000K
 - Neutral = 4000K
- Aluminium wall fixing bracket.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65.
- Insulation class III.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Hotel Mulino Grande, Cusago - IT Architectural project: Antonella Tesei

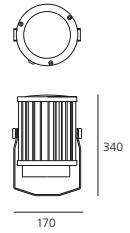

- Light fixture kit with halogen sources.
- Floor or wall installation.
- Dark green finish.
- The kit is composed by 3 cylinders containing 3 halogen projectors with red, green and blue dichroic filters, which allow a wide range of light coloured atmospheres to be created. A fourth cylinder contains the distribution board and the receiver.
- It is available in stand-alone or synchronized version, and up to 120 supplementary items, controllable from the same board (30 for each output), can be added to the basic lamp unit.
- It is possible, using a remote control, to select standard atmospheres and to adjust the light intensity.
- Lamp unit in extruded aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- A support bracket allows floor or wall mounting and the adjustment of projectors.
- Reflector in anodized aluminium.
- Transparent moulded tempered glass + coloured dichroic filters.
- Stainless steel fixing screws and silicone seal gaskets.
- Suitable for watertight connection.
- Technical features of the light fixture in compliance with EN60598-1.
- IP Rating IP65.
- Insulation class I.

$\alpha = 69^\circ$

- Several Metamorfosi kits can be connected at a certain distance from one another, so that they project the same colour tonalities or they alternate the same atmospheres simultaneously. This is obtained by using a special distribution board called repeater, which receives the remote control signals and forwards them to the single Metamorfosi kits.
- For working in synchronized mode, the following elements are needed:
 - 1 signal repeater distribution board provided with receiver for remote control;
 - a certain number of Metamorfosi kits for synchronized mode;
 - connection cables for synchronization signals (not included in the standard supply);
 - a remote control.
- The repeater distribution board is supplied with the mains voltage.
- It must be placed so as to be reached by the remote control signals. It is provided with four different outputs with RJ11 connectors (4/4). Each of them controls a group of Metamorfosi kit. A cable transferring the control signals to the first Metamorfosi kit is connected to each output. The cable coming out of the first kit goes towards the second Metamorfosi kit and so on, up to the last kit. The signal cable AVG26, provided with "straight" connection, is flat with 4 wires. A maximum of 30 kits can be connected to each output, while the sum of the lengths of the signal cables of the kits connected to an output must not exceed 70m.
- To avoid electromagnetic interferences, the signal cables must not be channelized together with other electric cables. The outputs which are not used on the repeater must be "closed" by means of the proper "end plug" supplied with the kit. In the same way the last kit of a group connected to an output must be closed.

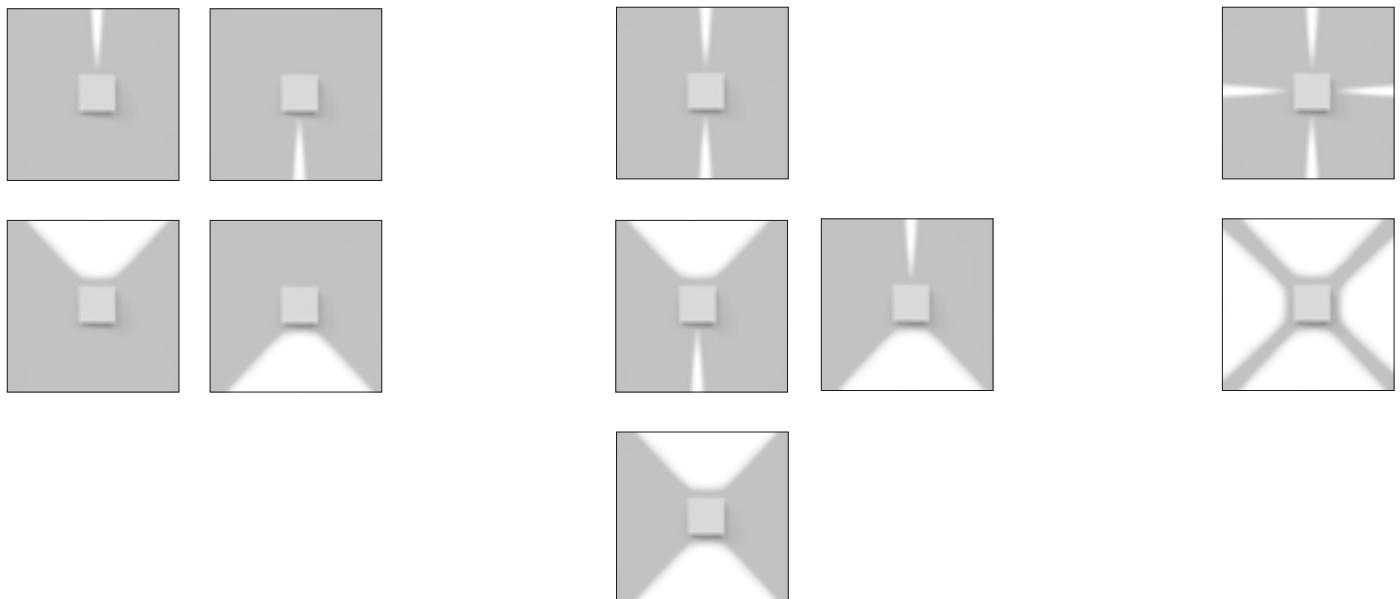

Effetto

2011

- 
- Light fixture with 1, 2 or 4 light beams using monochromatic LED light sources together with light-diffusing lenses which optimize the optical performance of the beams and establish their width. Designed to create geometric lights of scenic effect, it is available with beams of the same spread or with combined beams.
 - Beam spread 15° and 90°.
 - Wall installation.
 - Available in two finishes: light grey painted and rust painted.
 - Composed by lighting cap unit and terminal board fixed together by means of locking dowels.
 - Cap in die-cast EN AB-47100 aluminium.
 - Terminal board in reinforced polymer.
 - Watertight gasket in silicone rubber.
 - Electronic ballast integrated in the fixture.
 - PMMA lenses siliconed flush with the cap to obtain two different beam angle opening (narrow and wide).
 - White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
 - Wiring to be carried out inside the terminal board by piercing an IP65 membrane grommet suitable for cables with a diameter of 6-13 mm.
 - Locking dowels used outside the fixture in AISI 316 stainless steel.
 - Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
 - Technical features of light fixtures in compliance with EN60598-1.
 - IP Rating IP65.
 - ENEC approved.
 - Insulation class II.

- Light fixture with 2 combined light beams: the large one with lighting function and the narrow one with decorative function.
- Wall installation. The fixture can be installed with the main beam pointed either downwards or upwards according to the kind of lighting desired (direct or indirect).
- The large beam is obtained by the combination of a monochromatic LED light source with a reflector. The narrow beam is obtained by the combination of a monochromatic LED light source with a high-performance projector.
- Available in two finishes: light grey painted and anthracite grey painted.
- Composed by lighting cap unit and terminal board fixed together by means of locking screws.
- Cap and terminal board in die-cast EN AB-47100 aluminium.
- Watertight gasket in silicone rubber.
- Electronic ballast integrated in the fixture.
- Projector composed by a body in reinforced polymer and PMMA lenses.
- Tempered and silkscreened light-diffusing glasses, siliconed flush with the lighting cap.
- Power connection to the mains to be carried out outside the fixture, without need of opening it, by means of a pre-installed IP65 connection device suitable for cables with a diameter between 6 and 13 mm.
- Wall fixing by means of a bracket in folded steel sheet to which the fixture is fastened with two screws.
- Locking screws used outside the fixture in AISI 316 stainless steel.
- Die-cast aluminium and bracket painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

- Light fixture with direct side emission, with high-performance LED light sources. Six monochromatic LEDs are used together with six collimators and a light-diffusing prismatic screen to obtain an optimum lighting beam.
- Floor or wall installation. In the wall installation, the light can be pointed either upwards or downwards.
- Available in two finishes: light grey painted and rust painted.
- Composed by lighting cap and terminal board fixed together by means of locking screws.
- Cap and terminal board in die-cast EN AB-47100 aluminium, gaskets in silicone rubber. Electronic ballast integrated in the fixture.
- PMMA collimators installed on the LED light sources.
- Light-diffusing prismatic screen in PMMA siliconed flush with the lighting cap.
- Power connection to the mains to be carried out outside the fixture, without need of opening it, by means of a pre-installed IP65 connection device suitable for cables with a diameter between 6 and 13 mm.
- Wall installation by means of a bracket in folded steel sheet to which the fixture is fastened with two screws.
- Screws in AISI 316 stainless steel.
- All the components in die-cast aluminium and the steel bracket for wall or floor fixing are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

The elliptical light emission and the flat shape of the fixture make it particularly suitable for floors or spacious areas in gardens to provide a side lighting.

- Light fixture with diffuse emission, with halogen, fluorescent or LED sources.
- Wall and ceiling installation.
- Emergency version only for wall mounting.
- LED version available with microwaves movement detector adjustable from 2 to 10 m and from 10 to 30 minutes, and with daylight sensor adjustable from 10 to 500 lux.
- Lamp unit in AISI316 stainless steel.
- Moulded covering frame in AISI316 stainless steel, satiny or polished finish.
- Reflector in bright aluminium.
- Available with two types of diffusers:
 - Moulded prismatic diffuser in sodium-calcium glass with internal satin finish;
 - Moulded prismatic shock resistant diffuser in opal UV-stabilized thermoplastic material.
- AISI 316 stainless steel screws and polyurethane seal gaskets.
- Suitable for watertight connection.
- Ferromagnetic and electronic ballast.
- IP Rating IP65.
- ENEC approved (not for 1x18w fluo version).
- Insulation class I.

220/240Vac 50/60Hz electronic ballst

- Series of light fixtures with diffuse emission, with halogen, fluorescent or LED sources.
- Wall and ceiling installation.
- 3 sizes (190, 300 e 390mm).
- Available in two finishes:
silver grey painted and black painted.
- Available with two types of diffusers:
 - Honeycomb moulded diffuser in internally sanded sodium-calcium glass;
 - Honeycomb moulded prismatic shock resistant diffuser in opal polycarbonate.
- Pantarei 190 can be provided with half-light screen.
- Emergency version only for wall mounting.
- Pantarei 300 LED available with microwaves movement detector adjustable from 2 to 10 m and from 10 to 30 minutes, and with daylight sensor adjustable from 10 to 500 lux.
- Lamp unit in die-cast EN-AB 46100 aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Reflector in anodized aluminium.
- AISI 316 stainless steel screws and silicone seal gaskets.
- Suitable for watertight connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved:
only versions with ferromagnetic ballast.
- Insulation class I.

- Series of light fixtures with direct emission, with high-performance LED light sources.
- Floor, pole or wall installation.
- Available in two finishes: light grey painted and rust painted.

Chilone wall

- It can be installed with the light pointed either downwards or upwards.
- Composed by lamp, lamp support and wall support.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Lamp support in extruded EN-AW-6060 aluminium.
- Wall support in steel.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.
- Supporto parete incluso

Chilone pole

- Height 250 cm
- Composed by lamp, lamp support and ground fixing pole.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Lamp support in extruded EN-AW-6060 aluminium.
- Ground fixing pole in painted extruded EN-AW-6060 aluminium. It must be installed by means of a proper foundation plinth.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

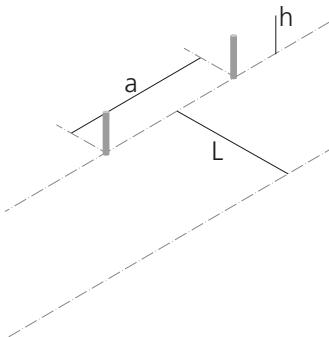

Chilone floor

- Available with downward emission in two heights (h4 5cm and h 90cm) and with upward emission (Chilone Up).
- Composed by lamp, support pole and ground mounting plate.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Support pole in extruded EN-AW-6060 aluminium, chromate treated and painted.
- Mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Ciclope

design
Alessandro Pedretti
(Studio Rota & Partners)
2009

- Lighting system with diffuse unilateral or bilateral emission, with high-performance LED light sources.
- Light emission is obtained by the combination of six monochromatic LED light sources, a reflector and an opaline diffuser.
- Floor, wall or recessed installation.
- Available in two finishes: light grey painted and rust painted.

Ciclope floor

- Available in unilateral and bilateral emission version and in two heights (h 50cm and h 90cm).
- Stem in extruded EN AW-6060 aluminium.
- Lighting unit composed by:
 - frame in reinforced polymer;
 - diffuser in light-diffusing polycarbonate;
 - plate in pickled, machined and galvanized steel;
 - watertight gasket in silicone rubber;
 - LED circuit;
 - electronic ballast;
 - riflettore in alluminio tornito in lastra e verniciato
 - PG13.5 cable gland, H05RN-F cable and IP65 electrical connection device suitable for cables with a diameter between 6 and 13 mm and allowing the electrical interfacing with the external mains without need of opening the fixture.
- The lighting unit houses the electrical components and sources.
- Aesthetic cover in die-cast EN AB-47100 aluminium.
- Ground mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.
- The elements are fixed together by means of screws. All the locking screws used outside the fixture and inside the stem are in AISI 304 stainless steel.
- The components in die-cast, extruded aluminium and steel are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Ciclope recessed

- Lighting unit composed by:
 - frame in reinforced polymer;
 - diffuser in light-diffusing polycarbonate;
 - plate in pickled, machined and galvanized steel;
 - watertight gasket in silicone rubber;
 - LED circuit;
 - electronic ballast;
 - riflettore in alluminio tornito in lastra e verniciato
 - PG13.5 cable gland, H05RN-F cable and IP65 electrical connection device suitable for cables with a diameter between 6 and 8.5 mm and allowing the electrical interfacing with the external mains without need of opening the fixture.
- The lighting unit houses the electrical components and sources.
- Aesthetic cover in die-cast EN AB-47100 aluminium painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Recessing box in reinforced polymer, can be ordered separately.
- The elements are fixed together by means of screws. All the locking screws used outside the fixture and inside the stem are in AISI 304 stainless steel.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

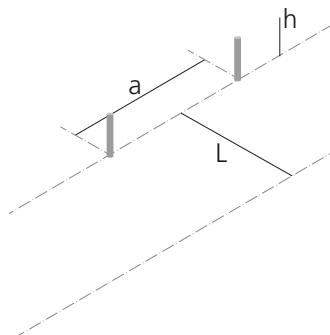

Ciclope wall

- Box in extruded EN AW-6060 aluminium.
- Lighting unit composed by:
 - frame in reinforced polymer;
 - diffuser in light-diffusing polycarbonate;
 - plate in pickled, machined and galvanized steel;
 - watertight gasket in silicone rubber;
 - LED circuit;
 - electronic ballast;
 - reflector in painted spun aluminium;
 - PG13.5 cable gland, H05RN-F cable and IP65 electrical connection device suitable for cables with a diameter between 6 and 8.5 mm and allowing the electrical interfacing with the external mains without need of opening the fixture.
- The lighting unit houses the electrical components and sources.
- Aesthetic cover in die-cast EN AB-47100 aluminium.
- The elements are fixed together by means of screws. All the locking screws used outside the fixture and inside the stem are in AISI 304 stainless steel.
- The components in die-cast, extruded aluminium and steel are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Nuda floor

- Series of light fixtures with direct unilateral or bilateral emission, with high-performance LED light sources.
- Floor and recessed installation.
- Available in two finishes: light grey painted and rust painted.

- Available in unilateral and bilateral emission version and in two heights (h 50cm and h 100cm).
- Composed by lamp, support pole and ground mounting plate.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Specular reflector in aluminium. It conveys and diffuses the luminous flow downwards ensuring visual comfort.
- Support pole in extruded EN-AW-6060 aluminium, chromate treated and painted.
- Mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Nuda incasso

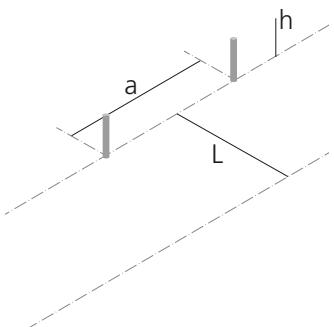

- Composed by lamp and recessing box for recessed wall installation.
- Lamp unit in painted die-cast EN-AB 44100 aluminium, complete with holding plate for electrical components.
- Specular reflector in aluminium. It conveys and diffuses the luminous flow downwards ensuring visual comfort.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Aesthetic cover in painted aluminium.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector suitable for H07RN-F cables with a diameter from 5 to 13.5 mm for the mains connection.
- Recessing box in reinforced polymer, can be ordered separately.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Aesthetic cover

- Light fixture with direct emission, with high-performance monochromatic LED light sources.
- Floor installation.
- Available in two heights (h 45cm and h 90cm).
- Composed by support with lamp compartment, lamp and accessory compartment.
- Painted cylindrical lamp support in vibrated concrete, with galvanized reinforcing ring for fixing to the base.
- Lamp unit in die-cast EN-AB 47100 aluminium, painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- UV resistant diffuser in transparent shock resistant polycarbonate.
- Accessory compartment in polymers with closure cover in AISI 316.
- Hot galvanized steel mounting plate, with holes for ground fixing by means of lag bolts or dowels.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.

Granito

design
Ernesto Gismondi
2010

- Light fixture with metal halide sources.
- The four light beams projected through the fissures on the sides make it particularly suitable for lighting drives or creating light effects in parks and gardens.
- Available in two heights (h 30cm and h 60cm).
- Lamp unit in Cor-ten (weathering steel).
- Transparent sodium-calcium bulb protection glass.
- Ground mounting plate in steel with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gaskets.
- Electronic ballast.
- Suitable for watertight connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

T083100 METAL HALIDE 1x35W (G12) – HIT

● rust Cor-ten

220/240Vac 50/60Hz electronic ballast

IP65

The colour of Cor-ten steel may change in time depending on weather conditions. Before stabilization, Cor-ten steel may release rust powder that may stain the surface where it is placed.

Artemide recommends not to position it on sensitive surfaces, such as clear stones, marbles, etc.

- Series of light fixtures with diffuse emission, with halogen or fluorescent sources.

Hila wall

- Series of light fixtures with direct emission, with high-performance LED light sources.
- Floor, pole and wall installation.
- Light grey finish.

- Composed by lamp and wall support.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish, provided with high-efficiency light-diffusing lenses.
- Wall support in painted steel.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Hila floor

- Composed by lamp, support pole and ground mounting plate.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish, provided with high-efficiency light-diffusing lenses.
- Support pole h=90cm in extruded EN-AW-6060 aluminium, chromate treated and painted.
- Mounting plate in painted steel, with holes for ground fixing by means of log bolts or dowels.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

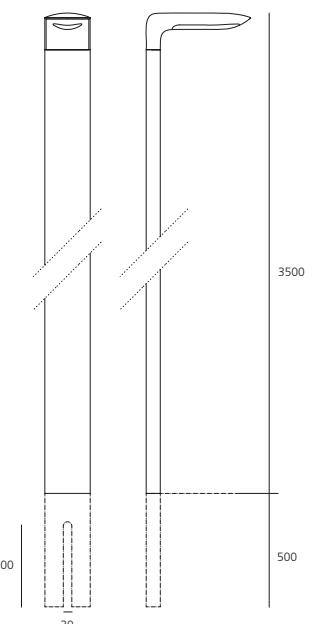

Hila pole

- Composed by lamp and ground support pole.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satin finish, provided with high-efficiency light-diffusing lenses.
- Support pole h=350cm above-ground + 50cm underground in extruded EN-AW-6060 aluminium, chromate treated and painted.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

The LED circuits are directly anchored to the aluminium casing of the body in order to maximize heat dissipation. Moreover, some dissipation fins have been included in the product design so as to increase the heat exchange surface with external air. The grid in the central part of the product allows natural air circulation, which cools the dissipation surface. Due to a natural convective motion, cold air removes heat from the dissipation grid, it heats up and goes upwards, through the lighting unit, getting new fresh air from the lower part. In this way LEDs are maintained at a lower temperature and their life time and light efficiency increase.

Solar Tree

design

Ross Lovegrove
2007

Solar Tree is a light fixture combining an innovative design with the technical performances of LED lighting systems using solar energy supplied from photovoltaic system.

This project aims to combine the reduced environmental impact, especially deriving from the low absorption of fossil fuel-based energy, with the need of ensuring constant working and expected light performances. The operation of this light fixture is not influenced by weather randomness and project changes due to winter periods (e.g. number of panels, accumulator dimensioning). These project changes concerning dimensions and weights would imply higher costs, and however the fixture would not ensure continuous working. In fact hybrid versions are being more and more used in leading sectors. In this direction Artemide has developed the Solar Tree project which, with a mixed configuration of accumulators/solar energy and mains power supply, can combine Energy-saving and functionality at the best.

- Structure composed by curved steel poles of different diameters and heights, with a maximum total height of about 5,5m over road level.

- This system is composed by 10 "stems of grass" with 40mm Ø. On their extremity there is 1 LED of about 1 W protected by a diffuser screen in PMMA and 10 poles with 76mm Ø supporting the heads.

The poles are painted with outdoor epoxy paint in light green colour shading into white.

- The 10 heads, housing the photovoltaic cells in their upper part, are supported by poles with a diameter of 76mm; 20 power LEDs, which can be supplied with power up to 500mA and have a white neutral colour temperature, are housed in the lower part of 4 of them, on an aluminium dissipator, and are provided with a screen in plastic material which ensures protection against water and dusts.

- The base is made of hot-galvanized steel plate to be fixed to the ground. Otherwise it is possible to use a base, always in galvanized steel, with reinforced concrete parts forming a circular bench. In this case the base can rest on the ground without need of further fixing systems.

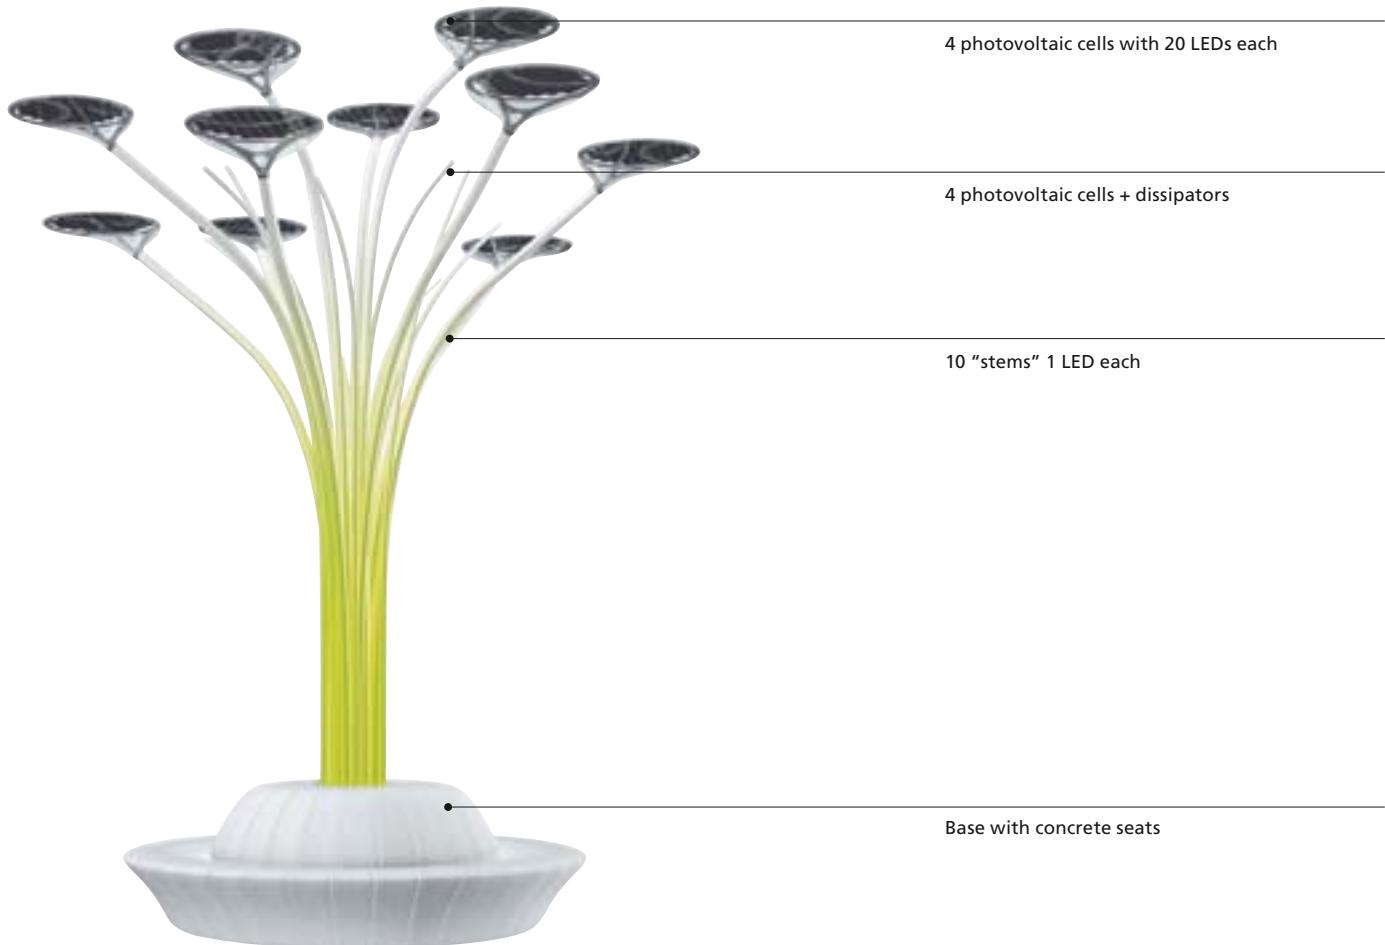

- The connection/wiring parts, the control and recharge boards and the batteries are contained in several watertight boxes, provided with male and female connectors with IP Rating IP65 or higher, placed at the foot of the base or inside the concrete bench, according to the technical specifications of the Solar Tree version supplied.

- Benches in white painted concrete, with second coat of anti-graffiti paint.

Technical data

- Total number of heads with solar panels: 10
- Number of heads with LEDs: 4
- Installed power for each light head:
about 23.1 W at 350mA (base current drive),
max current drive 500mA.
- 20 power LEDs for each head in neutral
light tonality 4300K.
- Maximum luminous flux for each head:
minimum 1250 Lm.
- Solar panel voltage in open circuit: about 10 V.
- Peak power for each panel: about 63 W.
- Total number of "stems": 10.
- LED power for each "stem":
about 1 W with a power supply of 350mA.
- 2 Batteries
- Battery voltage: 12 V
- Single battery capacity: 240 Ah
- Box with USB connection for diagnostics/
setting/servicing access.
- Technical features of the light fixture in compliance
with EN60598-1.
- IP Rating IP55.
- Insulation class II.

Working

Solar Tree has been designed to work in HYBRID configuration. The batteries can ensure an autonomous working at full charge for a period of 7-10 days (with an "Energy-saving" working cycle which is described below). Moreover, in case of discharged batteries, the fixture is connected to the mains, which supplies it with energy (by means of a suitable DC ballast connected to the mains). In this way it can ensure a continuous working even with persistent bad weather and/or reduced insulation or 100% use of the light performances or, anyway, in case of negative energy balance.

LED light sources light up in the twilight (recognized according to the hours of dawn and sunset which have been set in the management program or according to other modes) and they remain lit up until dawn according to the working duty-cycle set.

In case of "HYBRID" fixtures, the system uses the energy coming from the batteries until they reach the minimum charge limit, then the system is connected to the mains automatically.

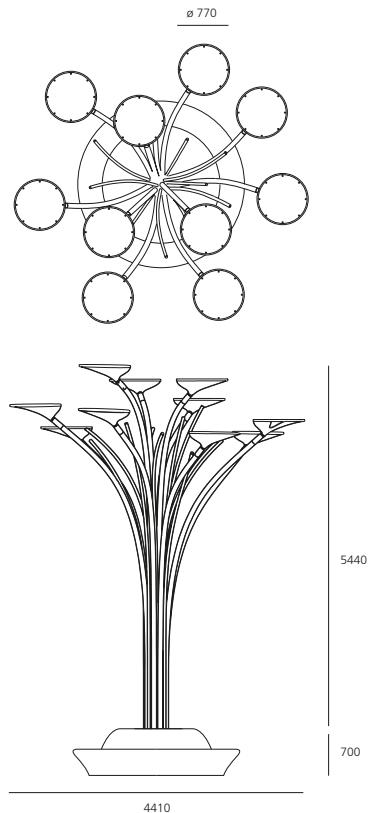

In case of light fixtures with this configuration, if the connection to the mains takes place at the same time when the public lighting, which the Solar tree fixtures refer to, lights up, it is possible to set them so as that the moment of the mains connection is recognized as start for the Solar tree working, and vice-versa in case of mains cut-off.

Working programs

Two working modes can be selected according to the needs: Manual and Automatic. Automatic mode can be set with three different configurations according to the performance and level of energy-saving desired for the light fixture. In particular:

Auto Eco

100% working in the hours when the installation areas are expected to be used more often, reduced working of the only LED heads during the hours of full night (the LED light sources are switched on and adjusted at about 25% of their working rating from sunset to dawn in order to ensure a mean floor lighting of 8 lux). This mode is recommended to obtain a continuous working even during autumn/winter and to maintain energy balance.

Auto 100%

Working mode to ensure the complete management of the fixture by considering its performances with respect to a higher input of solar energy (if this condition occurs).

Personalizzato

The user can establish the hours and the working configuration of the fixture according to his needs. The three above-mentioned configurations can be associated to a particular period and they can alternate one another, if desired.

Manual

Can be enabled by the user in case of particular events and/or needs. The user can access the advanced adjustment menu for a 0-100% slicing of the flow emitted by the single LED heads and by the "stem" units. In this way the sources remain lit up and adjusted according to the configuration set by the user until switching off or return to automatic mode controlled by the user.

Piazza della Scala, Milan - IT

Felsina wall

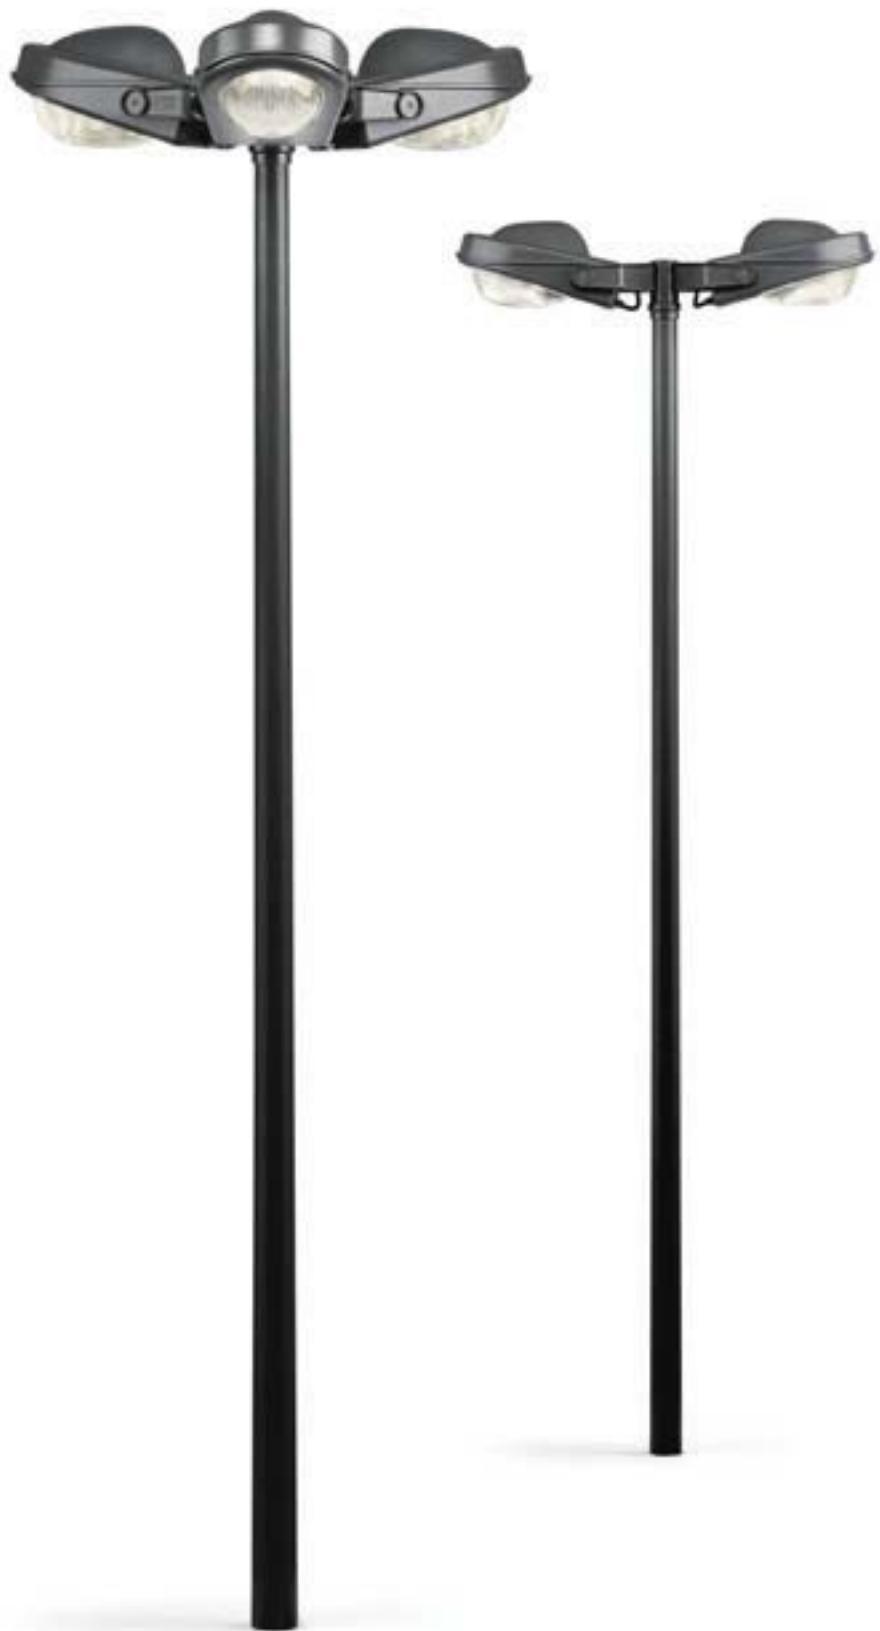

- Series of light fixtures with direct or dual emission, with metal halide or high pressure sodium vapour sources.
- Wall or pole installation.
- Available with fixed or adjustable projector.
- Lamp unit in painted die-cast EN-AB 46100 aluminium.
- Reflector in bright anodized aluminium.
- Moulded prismatic diffuser in sodium-calcium tempered glass..
- AISI 316 stainless steel screws and silicone seal gaskets.
- Painting is obtained with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- Insulation class I.

Classifications

Class I

The safety of the luminaire is guaranteed by an additional protective conductor (earth) connected with the metal frame of the lamp.

Class II

The safety of the luminaire is guaranteed by the double reinforced insulation of conductive parts, and without earth connection.

Class III

The luminaire is fitted with a protection device against electrical shock that features a very low voltage power supply and prevents it from generating higher voltages.

Note: a Class III luminaire does not have to be equipped with an earth protection.

Luminaire suitable for installation on normally inflammable surfaces.

Approvals

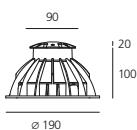

ENEC Certification of European Conformity.

IMQ Italian Institute of Quality Mark.

Sizes

Drawings in this catalogue are in mm.

IP Rate

IP65

Electrical fittings are preset in order to prevent the intrusion and contact with solids and liquids with live parts. Resistance against the penetration of solids and liquids is expressed by the initials IP, followed by two digits that stand for the degree of protection: the first referring to solids, the second to liquids.

First digit

- 0 Non-protected.
- 1 Protected against the penetration of solid objects greater than 50 mm.
- 2 Protected against the penetration of solid objects greater than 12 mm.
- 3 Protected against the penetration of solid objects greater than 2,5 mm.
- 4 Protected against the penetration of solid objects greater than 1 mm.
- 5 Dust-protected.
- 6 Dust-tight.

Second digit

- 0 Non-protected.
- 1 Protected against dripping water.
- 2 Protected against dripping water when tilted up to 15°.
- 3 Protected against spraying water.
- 4 Protected against splashing water.
- 5 Protected against water jets.
- 6 Protected against heavy seas.
- 7 Protected against the effects of immersion.
- 8 Protected against submersion.

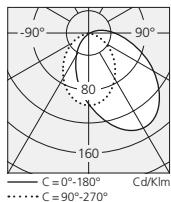

IK shock-resistance degree

IK10

The light fixture is placed on a horizontal stable surface. A body of a certain shape and weight is dropped repeatedly from a certain height according to the IK degree to be tested.

IK Degree	Impact Energy (J)	Equivalent impact
00	Unprotected	-
01	0,15	Fall of a 200g body from 40cm of height
02	0,2	Fall of a 200g body from 40cm of height
03	0,35	Fall of a 200g body from 40cm of height
04	0,5	Fall of a 200g body from 40cm of height
05	0,7	Fall of a 200g body from 40cm of height
06	1	Fall of a 500g body from 40cm of height
07	2	Fall of a 500g body from 40cm of height
08	5	Fall of a 1,7kg body from 40cm of height
09	10	Fall of a 5kg body from 40cm of height
10	20	Fall of a 5kg body from 40cm of height

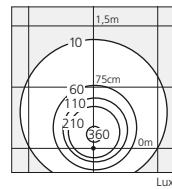

Photometric data

Photometric curve in polar coordinates

It represents the light intensity distribution (in candles/1000 lumen) emitted by the light fixture on the planes passing through its optical axis. Two curves are indicated for each light fixture. The first one refers to the transversal C0-C180 plane (continuous line) and the second one to the longitudinal C90-C270 plane (broken line). The photometric curve defines the lighting engineering features of the fixture, such as the luminous flux control, the type of emission, the maximum intensity direction, which are needed for testing illuminance values during use.

Photometric curves shown in this catalogue are only indicative. For accurate photometric data, calculations should be taken from Dialux programme.

Isolux diagram

It shows the illuminance distribution on the vertical plane (wall washer fixtures) or on the horizontal plane (floor fixtures and poles). The Isolux lines link the points of equal illuminance.

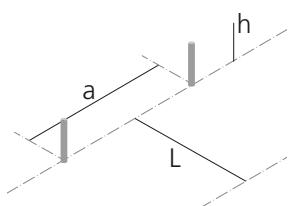

H m	$\phi C0$ m	$\phi C90$ m	E lux
0,5	0,05	0,05	46928

$\alpha = 6^\circ$

Light cone

It shows the maximum illuminance level in lux, measured in horizontal parts at different heights with respect to the fixture. $\phi C0$ and $\phi C90$ represent the lengths of the section axes. In case of rotating symmetric emissions, the two values coincide. The emission angle shows the flat angle subtended by the directions where light intensity is equal to the 50% of the maximum intensity.

Lighting application

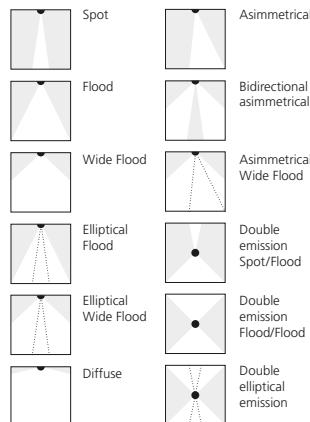

Summary of illuminance levels according to the design parameters.

h =source height

a =width of the light fixture positioning interval

L =illuminance distance

Light emissions

Symbols

Walk-over light fixture

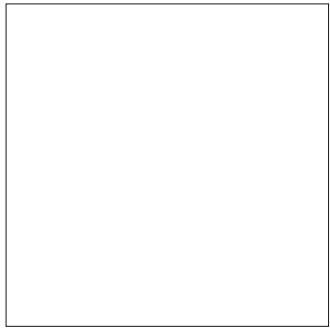

Drive-over light fixture

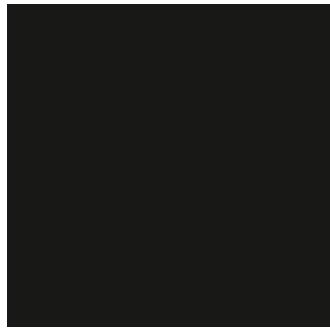

Light fixture with RGB colour mixing system.

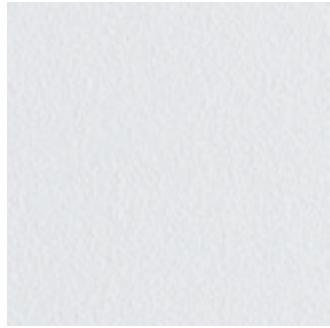

Finish

White

Black

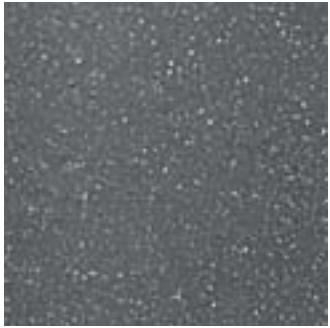

Light grey

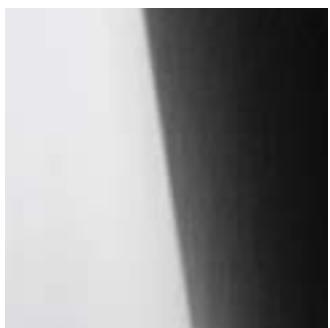

Silver grey

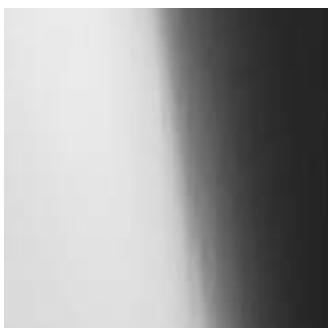

Anthracite grey

Antigua grey

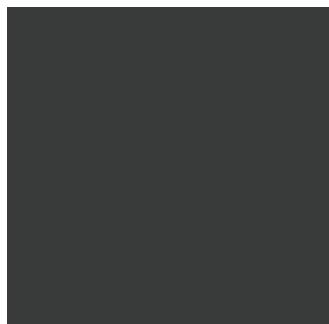

Polished

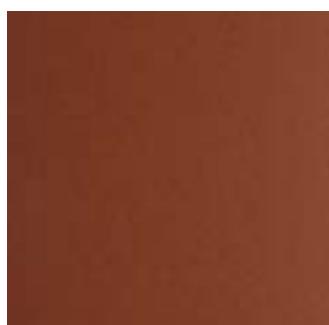

Satin

Green

Dark grey

Rust

Rust Cor-ten

The colour of Cor-ten steel may change in time depending on weather conditions. Before stabilization, Cor-ten steel may release rust powder that may stain the surface where it is placed.
